

Advanced Consulting Skills Course

An intensive two-day course for navigating complex relationships in business

Get Results through Influence Not Just Authority

Individuals responsible for acting as catalysts for growth and change have development needs that are unique and demanding! Are you someone who gets results through influence rather than reporting authority?

Are you a catalyst who helps other people in the organization achieve business goals? Does your effectiveness depend upon developing a shared understanding of your internal clients' situation and desired outcomes, and your ability to balance maintaining rapport with creating change?

The Advanced Consulting Skills Course is an intensive two-day training designed to build both the confidence and the skill to be effective as a catalyst working with internal and executive-level clients. Understand how to manage relationships with clients whose style or personality is dramatically different from yours. You will learn the skills and practice the applications using real-life content.

Consultants, through the nature of their charter, are responsible for partnering with operational leaders to deliver a solution or result. But to be effective, they must act as catalysts, that is, enter a business problem, design and implement a changed condition, then exit, on to the next challenge. Mastery of this process requires finely tuned skills. If your success depends on the client's outcome being met, not just on the transaction itself, this course is for you.
